

# RE-INTRODUCING OUR ULTRA MOISTURIZING CREAM HYDRATANTE!

- ▶ Low water formula rich with nourishing oil that helps to super hydrate skin.
- ▶ Hyaluronic acid helps retain moisture while candelilla wax helps to inhibit moisture loss.
- ▶ Helps calm dry rough or irritated skin.

After too long an absence, we're bringing back our previously beloved Cream Hydratante.

An ultra-moisturizing night cream for dry, rough, or irritated skin. It's a unique blend of emollients and nourishing oil that help soothe and calm skin while hyaluronic acid retains moisture and candelilla wax inhibits moisture loss. Excellent for the face and neck areas, it can also be used on hands, elbows, feet or anywhere skin is severely under moisturized.

## And we've made it better too!

We've replaced most of the water content with nourishing sunflower oil, which is rich in vitamins A, C, D, E and beta-carotene. We've also added hyaluronate gel to help retain more moisture, as well as a Candelilla Wax to help lock-in the moisture. Your skin will be drenched in a rich moisturizing layer.

SKU: 312

CATEGORY: HYDRATING

SKIN TYPE: ALL SKIN TYPES

MSRP: \$24.00

UPC: 087992111242
